"During the second quarter, our portfolio of iconic brands continued to resonate with consumers. We have sharpened our execution and increased investment across the business, and are beginning to see early returns through accelerating dollar and volume share gains in both our Beer and Wine & Spirits businesses relative to the first quarter. As a result, we were the #1 dollar share gainer in beverage alcohol

during the second quarter. Looking ahead, we remain focused on building on this momentum by expanding our reach across more consumers and occasions, while investing behind the brands and capabilities that will support our next phase of growth."

Nicholas Fink - President & CEO

"Through the first half of fiscal 2027, our strong cash flow generation enabled us to continue executing our disciplined and balanced capital allocation priorities. We maintained our target comparable net leverage ratio of ~3.0x, returned more than \$800 million to shareholders through share repurchases and dividends, and continued to invest in our business through increased

brand marketing support. As we look to the second half of the year, we remain committed to supporting long-term growth, maintaining financial flexibility, and returning capital to shareholders."

BEER

	Shipments	Depletions	Net Sales	Operating Income (Loss)
Three Months Ended in millions; branded product, 24-pack, 12-ounce case equivalents				
August 31, 2026	123.9		\$2,473.6	\$964.2
August 31, 2025	117.4		\$2,345.0	\$951.6
% Change	5.5%	(0.6%)	5%	1%

HIGHLIGHTS

- Net sales increased 5% driven by a 5.5% increase in shipment volumes.
- Operating margin decreased 160 bps to 39.0% as lower tariff expenses and favorable fixed cost absorption were more than offset by increased marketing investment and other SG&A spend.
- Depletions decreased 0.6% as declines for Modelo Especial of approximately 2% and Corona Extra of approximately 5% were partially offset by growth from Pacifico, Victoria, and the Modelo Chelada brands of approximately 19%, 15%, and 5%, respectively. One additional sell day during the quarter was largely offset by a shift in the timing of the Labor Day holiday, resulting in minimal impact on underlying depletion trends.
- Our Beer Business ranked as the #1 dollar and volume share gainer in Circana U.S. tracked channels and had 5 of the top-15 dollar share gaining brands across the entire U.S. beer category:
 - Modelo Especial maintained its position as the #1 brand by dollar sales and was the #3 dollar share gainer. Within the brand family, Modelo Chelada Limón y Sal was the #6 dollar share gainer;
 - Corona Extra remained a top-five brand by dollar sales, while Corona Familiar was the #14 dollar share gainer;
 - Pacifico and Victoria were the #2 and #10 dollar share gainers, respectively, and Pacifico became a top-10 brand by dollar sales.

SPIKEDADE ACQUISITION

Subsequent to the quarter, we acquired SpikedAde, a differentiated, consumer-led spirit-based RTD brand competing in the emerging "Ade" segment. The addition of SpikedAde to our portfolio of iconic brands is consistent with our strategy to selectively expand into new demand spaces aimed at sustainable consumer trends, strengthens our position in the fast-growing RTD category, and remains aligned with our disciplined capital allocation priorities. The transaction included a \$75 million payment at close for 100% ownership of the business, as well as additional contingent consideration of up to \$278 million payable over five years based on the future performance of the SpikedAde business. The acquisition does not impact our fiscal 2027 outlook below.

HIGHLIGHTS

- Net sales increased 17% driven by a 15.4% increase in shipment volumes.

RECONCILIATION OF REPORTED AND ORGANIC NET SALES

(in millions)
(unaudited)

For periods of acquisition, we define organic net sales as current period reported net sales less net sales of products of acquired businesses reported for the current period, as appropriate. For periods of divestiture, we define organic net sales as prior period reported net sales less net sales of products of divested businesses reported for the prior period, as appropriate. We provide organic net sales because management uses this information in monitoring and evaluating the underlying business trends of our core operations. In addition, we believe this information provides our investors and other external users valuable insight on underlying business trends and results in order to evaluate year-over-year financial performance.

Undesignated commodity derivative contracts

Net gain (loss) on undesignated commodity derivative contracts represents a net gain (loss) from the changes in fair value of undesignated commodity derivative contracts. The net gain (loss) is reported outside of segment operating results until such time that the underlying exposure is recognized in the segment operating results. At settlement, the net gain (loss) from the changes in fair value of the undesignated commodity derivative contracts is reported in the appropriate operating segment, allowing the results of our operating segments to reflect the economic effects of the commodity derivative contracts without the resulting unrealized mark to fair value volatility.

Strategic business reconfiguration costs

We recognized costs in connection with activities intended to streamline operations, improve efficiencies, and reduce our cost structure. Operating income (loss) also includes the loss on settlement of a receivable related to the sale of a previously-owned facility (three months and six months ended August 31, 2026).

Flow through of inventory step-up

In connection with acquisitions, the allocation of purchase price in excess of book value for certain inventories on hand at the date of acquisition is referred to as inventory step-up. Inventory step-up represents an assumed manufacturing profit attributable to the acquired business prior to acquisition.

Asset impairment and related expenses

We recognized (i) impairments on assets held for sale associated with management's plan to divest the Nelson's Green Brier business (three months and six months ended August 31, 2026) and on then-existing net assets held for sale in connection with the New Zealand Wine Divestitures (six months ended August 31, 2026) and (ii) contract liabilities and inventory obsolescence expenses associated with the 2025 Wine Divestitures, partially offset by changes in the carrying value of those then-existing net assets held for sale (six months ended August 31, 2025).

2025 Restructuring Initiative

We recognized costs in connection with an enterprise-wide cost savings and restructuring initiative designed to help optimize the performance of our business.

A limitation of free cash flow is that it does not represent the total increase or decrease in the cash balance for the period.
